

RIESE & MÜLLER

Press release

The new Supercharger.

Perfectly integrated design and breathtaking riding dynamics.

- Supercharger range with a totally new electric bike image.
- Fully integrated frame design boasting DualBattery Technology.
- Supercharger mountain as a perfect, long-distance E-MTB.
- Sporty riding dynamics and a comfortable seating position.

Weiterstadt, Germany, 24/07/2017: The new Supercharger really packs a punch in terms of design and range. Up to two Bosch PowerTube batteries are fully integrated in the ultra-sporty two-coloured frame, creating a new and powerful E-Bike look.

Riese & Müller's Supercharger has evolved from the successful Charger range but represents a totally new E-Bike design concept. The bike combines Riese & Müller's DualBattery Technology, using two Bosch PowerTube batteries for twice the range with a new frame-integrated design. "The Supercharger represents a top-class electric bike. Maximum range, bold appearance and the comfortable seating position cyclists have become accustomed to with the Charger – all combine to make the bike perfect for long-distance cyclists," explains Heiko Müller, founder and CEO of Riese & Müller.

By incorporating two Bosch PowerTube batteries into the main frame, the E-Bike has a seamless appearance, creating an extremely sporty impression. Integration continues with the internally routed cables, showing off the bike's frame to best advantage. This look is further enhanced by the typical Charger kink in the frame and the new paintwork finish with sharp dividing lines along the tubes. Thanks to its ultra-rigid frame, the Supercharger's riding dynamics are simply outstanding.

The elevated chainstays on the Supercharger allow versions with a low-maintenance carbon belt drive that delivers the ultimate in riding comfort as well as running quietly. The carbon belt drive on all models boasts NuVinci and Rohloff gears. Sportier cyclists cannot fail to be thrilled by the efficient 11-speed Shimano Deore XT derailleur on the Supercharger GT touring model, which is also available as HS version.

All Supercharger models can be fitted with an optional DualBattery delivering 1,000 Wh, doubling the battery capacity as well as the range. You can now plan long-distance day excursions with no need to schedule a stop to recharge the battery, and charging is no longer a constant issue for commuters.

The combination of extensive range and batteries fully integrated in the frame also comes into its own off-road: the new model will also be produced as the Supercharger mountain with dynamic Shimano Deore XT 11-speed derailleur and top-quality Fox suspension forks.

Its riding behaviour and performance are perfect for long trips with considerable elevation gain.

The Supercharger comes in electric blue metallic and urban silver metallic. It is available in seven different versions from October 2017 and from 4,049.00 £.

Supercharger GT touring: Bosch Performance CX, 500 Wh PowerTube, 11-speed Shimano Deore XT, Fat Tires, 4,049.00 £.

Supercharger GT touring HS: Bosch Performance Speed, 500 Wh PowerTube, 11-speed Shimano Deore XT, Fat Tires, 4,319.00 £.

Supercharger GH nuvinci: Bosch Performance CX, 500 Wh PowerTube, continuous NuVinci, belt drive, Fat Tires, 4,139.00 £.

Supercharger GT nuvinci HS: Bosch Performance Speed, 500 Wh PowerTube, continuous NuVinci, belt drive, Fat Tires, 4,589.00 £.

Supercharger GX rohloff: Bosch Performance CX, 500 Wh PowerTube, 14-speed hub gear Rohloff, belt drive, Fat Tires, 5,309.00 £.

Supercharger GX rohloff HS: Bosch Performance Speed, 500 Wh PowerTube, 14-speed hub gear Rohloff, belt drive Rohloff, Fat Tires, 5,579.00 £.

Supercharger mountain: Bosch Performance CX, 500 Wh PowerTube, 11-speed Shimano Deore XT, Fox suspension forks, 4,499.00 £.

About Riese & Müller

Riese & Müller is a premium German manufacturer of E-Bikes, E-Cargo Bikes and folding bikes. Founded in 1993 by Markus Riese and Heiko Müller, the company today employs over 250 people at its site in Weiterstadt near Darmstadt. Alongside the two founders, Dr. Sandra Wolf has also held the position of Managing Director since 2013. Riese & Müller is shaping the e-mobility of tomorrow with its products: its name is synonymous with user-focussed product development, E-Bike technologies and Riese & Müller's characteristic powerful riding dynamics. The brand has now gone global and distributes through an exclusive network of dealers.
